Subject: Fw: 9th Distict Sites

correction -- maywood is not in CD9 -- curcio scrap metal in saddle brook is in CD9, however -- but not much is going on there.

hi ian -- attached are the maps of congressman pascrell's old and new districts, with superfund NPL sites shown in each.

looks like you lose: wr grace (the congressman attended a recent event we did there), the glen ridge/west orange/montclair radium sites, and the pompton/duPont site (not a superfund site, but very active) -- the superfund sites are deleted, so pompton is the loss of major consequence, in terms of active projects.

looks like you get: maywood, garfield, industrial latex (deleted), ventron-velsicol / universal oil / scp (collectively, the berry's creek sites), and quanta -- all of these are active except industrial latex and maywood -- here are links to our website on garfield (the congressman attended a recent event we did there), berry's creek, and quanta.

garfield --> <http://www.epa.gov/region2/superfund/removal/garfield/>  
berry's creek study area --> <http://www.epa.gov/region2/superfund/npl/berryscreek/index.html>  
quanta --> <http://www.epa.gov/region2/superfund/npl/quanta/>

please let me know what other info i can provide at this point -- thanks.

hi again tom -- david is currently out of the country -- i spoke with the person who is covering tonight's meeting for him, and she says we do not expect any local press to attend.

thanks.

hi tom -- i don't believe that press normally attend our passaic CAG meetings -- david, is that correct and would that be the case tonight?

thanks.

Good afternoon, gentlemen,

Are you expecting any reporters at tonight's CAG meeting? I know Fallon wrote about it today. Just curious.

Thanks!

T
